HARSH KUMAR MEHTA

Backend Engineer | Node.js & Distributed Systems
Email: harshmehta0519@gmail.com | Phone: +91 9988331757
Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4

PROFESSIONAL SUMMARY

Backend Engineer with 2+ years developing robust, scalable software components in production. Strong in Node.js/Express REST services, distributed and multi-tiered systems, and data modelling across relational (PostgreSQL, MySQL) and NoSQL (MongoDB) stores. Balances speed of delivering new features with the robustness of the components built — writes clean, maintainable code, actively participates in code and design reviews, automates integration and regression tests, and resolves operational and production issues with minimal oversight. Solid understanding of data structures and their application, distributed programming concepts, and secure, high-performance delivery. Keen to learn product architecture, contribute to proof-of-concept initiatives, and adhere to change and incident management standards.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST API design, JWT Authentication, RBAC, Microservices, Webhooks, Third-Party API Integrations
Languages: JavaScript (ES6+), TypeScript, Python, SQL
CS Fundamentals: Data Structures & Algorithms, Distributed & Multi-Tiered Systems, System Design, OOP, Caching, API Security
Databases: PostgreSQL, MySQL (Relational), MongoDB (NoSQL) — Schema Design, Query Optimization, Indexing
Quality & Operations: Code & Design Reviews, Automated / Integration / Regression Testing, Debugging, Monitoring, Incident Handling
Cloud & Tooling: GCP, Docker, Git, CI/CD (GitHub Actions), Postman, npm, Agile (Scrum)

PROFESSIONAL EXPERIENCE

Full Stack Developer (Backend-focused) — Grest
Mar 2026 – Present

- Design and maintain REST APIs on a distributed, multi-tiered Node.js/Express backend powering a live e-commerce platform serving daily customers
- Deliver high-performance, scalable, and secure components; designed SQL and MongoDB schemas and optimized queries and indexes for throughput
- Handle operational and production issues with little or no oversight — triage, debug, and resolve root causes to maintain service quality and functional accuracy
- Actively review code across the team to uphold software quality and best practices (style, testability, efficiency)
- Automated integration and regression test scripts and CI/CD pipelines for repeatable, reliable releases
- Integrated third-party APIs with retry and idempotency; built Python automation cutting manual effort by ~90%
- Participate in design discussions and Agile (Scrum) ceremonies that influence architecture and delivery

Full Stack Developer — AGBE India
Apr 2025 – Mar 2026

- Built backend services and admin data workflows for products, orders, and users over relational databases
- Implemented filters, pagination, and reporting queries; wrote functional tests for critical flows
- Reviewed peers' code for quality and correctness, and debugged and remediated production defects to improve reliability

Full Stack Developer (Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built performance-optimized applications and backend integrations for dynamic content platforms
- Improved response and page-load performance through caching and code-splitting
- Supported prototyping and integration efforts within a fast-paced delivery cycle

PROJECTS

Arcus Dashboard (Distributed Backend)

- Designed a distributed microservices architecture with independently scalable, multi-tiered services and caching to reduce API latency
- Built Node.js backend over MongoDB and PostgreSQL with RBAC, JWT auth, automated API tests, and CI/CD
- Planned failure handling, service isolation, and monitoring across environments

Price Intelligence Engine (Node.js + Python)

- Built a service that scrapes, normalizes, and stores live competitor pricing into a relational database
- Exposed cleaned data through REST APIs with scheduled jobs for automated daily updates

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

RESEARCH & PUBLICATIONS

IEEE Publication (2024) — Deep Learning for Heart Disease Detection

- Built and evaluated Python-based deep learning models; owned data preprocessing, feature engineering, and model evaluation

SOFT SKILLS

Software Quality Focus • Operational Ownership • Code & Design Reviews • Problem Solving • Self-Directed Learning • Collaboration with Product & Engineering Teams • Adaptability

PERSONAL DETAILS

Date of Birth	19 May 2001
Languages Known	English, Hindi
Location	Open to Bangalore — willing to relocate
Notice Period	Negotiable

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge and belief.

Harsh Kumar Mehta
