HARSH KUMAR MEHTA

Software Engineer | Full-Stack Web & Digital Learning Solutions
Email: harshmehta0519@gmail.com | Phone: +91 9988331757
Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4

PROFESSIONAL SUMMARY

Software Engineer with 2+ years designing, developing, testing, and maintaining scalable, secure, and user-centric software applications in production. Strong in full-stack development with Node.js/Express and React/Next.js, REST API design, and data modelling across relational (PostgreSQL, MySQL) and NoSQL (MongoDB) stores. Experienced building web applications, tools, and platforms that support content delivery and enhance end-user experiences. Works within Agile teams — contributing to sprint planning, daily stand-ups, and retrospectives — performs code reviews, debugging, troubleshooting, and defect resolution, and maintains clear technical documentation including design specifications and deployment procedures. Solid grasp of software architecture, design patterns, and development best practices, with a genuine interest in high-impact digital learning solutions and continuous improvement.

TECHNICAL SKILLS

Web & Frontend: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive & Accessible UI
Backend: Node.js, Express.js, REST API design, JWT Authentication, RBAC, Microservices, Webhooks, Third-Party API Integrations
CS Fundamentals: Data Structures & Algorithms, Software Architecture, Design Patterns, System Design, OOP, Caching, Application Security
Databases: PostgreSQL, MySQL (Relational), MongoDB (NoSQL) — Schema Design, Query Optimization, Indexing
Quality & Process: Code Reviews, Unit / Integration / Regression Testing, Debugging, Troubleshooting, Defect Resolution, Technical Documentation
Cloud & Tooling: GCP, Docker, Git, CI/CD (GitHub Actions), Postman, npm, Agile (Scrum)

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer — Grest
Mar 2026 – Present

- Design, develop, test, and maintain scalable, secure web applications and REST APIs on a Node.js/Express and React stack powering a live platform serving daily users
- Build high-performance and user-centric features and tools; designed SQL and MongoDB schemas and optimized queries and indexes for throughput
- Perform code reviews, debugging, troubleshooting, and defect resolution to ensure application reliability and functional accuracy
- Optimize application performance, security, and usability while adhering to coding standards and best practices
- Participate in Agile (Scrum) ceremonies — sprint planning, daily stand-ups, and retrospectives — that shape architecture and delivery
- Maintain technical documentation, including design specifications, code documentation, and deployment procedures
- Automated integration and regression tests and CI/CD pipelines for repeatable, reliable releases; integrated third-party APIs with retry and idempotency

Full Stack Developer — AGBE India
Apr 2025 – Mar 2026

- Built web applications and admin data workflows for products, orders, and users over relational databases
- Implemented filters, pagination, and reporting queries; wrote functional tests for critical flows
- Reviewed peers' code for quality and correctness, and debugged and remediated production defects to improve reliability

Frontend / Full Stack Developer (Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built performance-optimized applications and integrations for dynamic content-delivery platforms
- Improved response and page-load performance through caching and code-splitting
- Supported prototyping and integration efforts within a fast-paced delivery cycle

PROJECTS

Arcus Dashboard (Full Stack Application)

- Designed a scalable, multi-tiered microservices architecture with caching to reduce API latency
- Built Node.js backend and React frontend over MongoDB and PostgreSQL with RBAC, JWT auth, automated tests, and CI/CD
- Planned failure handling, service isolation, and monitoring across environments

Price Intelligence Engine (Node.js + Python)

- Built a service that scrapes, normalizes, and stores live pricing into a relational database
- Exposed cleaned data through REST APIs with scheduled jobs for automated daily updates

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)

Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

RESEARCH & PUBLICATIONS

IEEE Publication (2024) — Deep Learning for Heart Disease Detection

- Built and evaluated Python-based deep learning models; owned data preprocessing, feature engineering, and model evaluation

SOFT SKILLS

Software Quality Focus • Collaboration Across Cross-Functional Teams • Code & Design Reviews • Problem Solving • Self-Directed Learning • Continuous Improvement • Adaptability

PERSONAL DETAILS

Date of Birth	19 May 2001
Languages Known	English, Hindi
Location	Open to relocation across India
Notice Period	Negotiable

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge and belief.

Harsh Kumar Mehta
