HARSH KUMAR MEHTA

Email: harshmehta0519@gmail.com | Phone: +91 9988331757
Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4

SUMMARY

Full Stack Software Engineer with 2+ years of experience designing, developing, and maintaining scalable web applications across distributed, multi-tiered systems. Strong in object-oriented design and REST API development with JavaScript (Node.js) and Python, working with both NoSQL (MongoDB) and relational (PostgreSQL) databases. Writes clean, efficient, well-documented code; experienced in code reviews, automated testing, and supporting software across test, integration, and production environments within Agile (Scrum) teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Microservices
Frontend: React.js, Next.js, Tailwind CSS
Databases: MongoDB (NoSQL), PostgreSQL (Relational), Query Optimization
Cloud & Tools: GCP (Cloud Storage, Firebase, BigQuery), Docker, Git, CI/CD, Vercel, Netlify
Testing: Automated & Functional Testing, Postman, Debugging, Performance Testing
Concepts: Distributed Multi-Tiered Systems, Algorithms & Data Structures, OOP, System Design, RBAC, API Security, Caching, Agile (Scrum/Kanban)

EXPERIENCE

Full Stack Developer (MERN + Shopify) — Grest
Mar 2026 – Present

- Develop and maintain REST APIs on a distributed, multi-tiered Node.js/Express architecture serving a live e-commerce platform
- Built Python automation pipelines for competitor price scraping and bulk catalog updates, cutting manual effort by ~90%
- Implemented JWT-based authentication and role-based access control (RBAC)
- Designed MongoDB (NoSQL) schemas and optimized queries for backend performance
- Monitor, debug, and resolve production issues across frontend and backend, ensuring uninterrupted customer experience
- Participate in code reviews and Agile (Scrum) ceremonies — sprint planning, iterations, and user stories

Full Stack Developer (Angular) — AGBE India
Apr 2025 – Mar 2026

- Developed e-commerce admin dashboards for products, orders, and users using object-oriented design principles
- Implemented filters, pagination, and data workflows backed by relational databases
- Built reusable components, integrated third-party APIs, and wrote functional tests for critical flows
- Debugged and remediated production defects, improving system reliability

Full Stack Developer (Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built responsive, performance-optimized web applications using Next.js
- Integrated APIs and improved page-load performance through caching and code-splitting
- Delivered scalable frontend architecture for dynamic content platforms

PROJECTS

Arcus Dashboard (Full Stack Application)

- Developed a role-based dashboard with secure access control (RBAC) and JWT authentication
- Built backend services in Node.js using both MongoDB (NoSQL) and PostgreSQL (relational) databases
- Wrote automated tests for API endpoints and documented services for maintainability

Arcus Dashboard (System Design)

- Designed a distributed microservices architecture with independently scalable, multi-tiered services
- Implemented caching strategies to reduce API response times
- Built CI/CD workflows for automated build, test, and deployment
- Planned failure handling, service isolation, and monitoring across environments

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

RESEARCH

IEEE Publication (2024) — Deep Learning for Heart Disease Detection

- Built and evaluated Python-based deep learning models; analyzed algorithmic performance and real-world applicability

SOFT SKILLS

Problem Solving • Debugging • Communication • Collaboration with Product & Business Teams • Ownership • Adaptability
