HARSH KUMAR MEHTA

Email: harshmehta0519@gmail.com | Phone: +91 9988331757
Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4

SUMMARY

Full-stack developer (2–3 years) with a research background in applied machine learning and a strong bias toward data-driven, quantitatively intense problems. Experienced in building backend services and integrations that move and synchronize data between systems (ETL-adjacent pipelines), writing and optimizing SQL for reporting and retrieval, and processing data in Python. Published IEEE research on deep learning for heart disease detection, covering data preprocessing, feature engineering, and model evaluation. MCA from BIT Mesra. Comfortable engaging cross-functionally to translate business requirements into technical solutions.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript (ES6+)
Data & Analytics: Python data processing (Pandas/NumPy), SQL querying & reporting, data cleaning & transformation, ML with scikit-learn & TensorFlow (preprocessing, feature engineering, model training & evaluation)
Data Platforms & Integration: Snowflake, Databricks, ETL-adjacent pipelines, system-to-system data sync, Shopify Admin API (REST & GraphQL), third-party API integrations, scheduled/automated jobs
Backend/Web: Node.js, Express.js, REST APIs, Next.js, React.js, MongoDB (NoSQL), PostgreSQL/MySQL (Relational)
Tools: Git, CI/CD (GitHub Actions, Vercel), Postman, Docker (basic)

EXPERIENCE

Full Stack Developer — Grest
Mar 2026 – Present

- Designed and maintained data integrations between Shopify and internal systems, syncing data via the Admin API (REST & GraphQL) — ETL-adjacent pipeline work moving records between platforms with transformation and reconciliation
- Built backend services handling order, inventory, and customer data workflows across a live e-commerce platform
- Wrote and optimized SQL queries for reporting and data retrieval, improving query performance and reporting turnaround
- Built Python automation for data scraping, cleanup, and bulk catalog updates, cutting manual effort by ~90%
- Improved site performance through analytical profiling — PageSpeed desktop 34→75 and mobile 31→55
- Collaborated cross-functionally to translate business requirements into technical solutions

Full Stack Developer — AGBE India
Apr 2025 – Mar 2026

- Built admin dashboards and data workflows for products, orders, and users backed by relational databases
- Implemented filters, pagination, and reporting queries over SQL data stores
- Integrated third-party APIs and wrote functional tests for critical data flows

Full Stack Developer — Cosmoon Media
Jan 2024 – Mar 2025

- Built performance-optimized web applications and integrated backend services for dynamic, data-driven content
- Improved page-load performance through caching and code-splitting

RESEARCH & ACADEMIC PROJECT

IEEE Publication (2024) — Deep Learning-based Approach for Heart Disease Detection

- Built and evaluated Python-based deep learning models (TensorFlow, scikit-learn) for classification on clinical health data
- Owned the full data pipeline: data preprocessing, cleaning, and feature engineering
- Performed model training and quantitative evaluation (accuracy, precision/recall) and analyzed real-world applicability

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

SOFT SKILLS

Analytical Problem Solving • Data-Driven Thinking • Client & Stakeholder Communication • Ownership • Cross-Functional Collaboration • Adaptability
