Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4 | Location: Gurugram / Delhi NCR

SUMMARY

Front End Developer with 2.5+ years of experience building responsive, performance-optimized web applications with React.js and Next.js. Strong proficiency in JavaScript (ES6+) with working knowledge of TypeScript; experienced in component-driven development, SSR/SSG rendering strategies, code-splitting, state management, and consuming REST and GraphQL APIs with caching and retry strategies. Working knowledge of Vue.js and Nuxt.js, actively expanding across both major SSR ecosystems. Available to join immediately in Gurugram (offline).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript (working knowledge), HTML5, CSS3, SASS/SCSS

Next.js / React.js: SSR, SSG, ISR, Dynamic Imports, Code-Splitting, Functional Components, Hooks, Context API, Error Boundaries, Suspense

Vue / Nuxt.js: Component-driven Vue, Nuxt SSR/SSG concepts, file-based routing (working knowledge, actively upskilling)

State Management: Redux Toolkit, Zustand, Context API

Styling: SASS/SCSS, Tailwind CSS, CSS Variables, Component-Driven Development, Responsive Design

APIs: REST & GraphQL consumption, Caching & Retry Strategies, JWT Authentication, RBAC

Architecture: Micro-Frontends (Module Federation — working knowledge), Performance Optimization, Core Web Vitals

Backend & Tools: Node.js, Express.js, MongoDB, PostgreSQL, Git, Docker, CI/CD, Vercel, Netlify

EXPERIENCE

Full Stack Developer (React / Next.js + Node.js) — Grest **Mar 2026 – Present**

- Built the React frontend for Grest TradeIn, a device trade-in platform with Government of India integration for device/IMEI verification, backed by Node.js REST APIs over MongoDB and deployed on AWS
- Developed responsive, component-driven UI for verification and status-tracking workflows, consuming secure REST APIs with JWT auth, retries, and idempotency, and keeping the UI consistent under failure conditions
- Maintain and extend the Shopify storefront — Admin REST/GraphQL integrations, pricing, and webhooks driving the trade-in flow
- Improved application performance through profiling and optimization — PageSpeed desktop 34→75 and mobile 31→55
- Built Python automation and data pipelines for scraping, cleanup, and bulk catalog updates, cutting manual effort by ~90%
- Deploy features on AWS and support production issues; collaborate with product and design teams

Full Stack Developer (Angular) — AGBE India **Apr 2025 – Mar 2026**

- Developed e-commerce admin dashboards for products, orders, and users with reusable, component-driven UI patterns
- Implemented filters, pagination, and complex data workflows over REST APIs
- Wrote functional tests for critical UI flows and debugged production defects, improving reliability

Full Stack Developer (Next.js) — Cosmoon Media **Jan 2024 – Mar 2025**

- Built responsive web applications using Next.js with SSR/SSG rendering strategies for SEO-critical pages
- Improved page-load performance through code-splitting, dynamic imports, and caching
- Delivered scalable, component-driven frontend architecture for dynamic content platforms

PROJECTS

Arcus Dashboard (Full Stack Application)

- Built a role-based React dashboard with protected routes (React Router) and centralized state management
- Implemented secure access control (RBAC) with JWT authentication and error boundaries for graceful failure handling
- Backend services in Node.js with MongoDB and PostgreSQL

Arcus Dashboard (System Design)

- Designed a modular, independently deployable frontend architecture aligned with micro-frontend principles
- Implemented caching strategies to reduce API response times; built CI/CD workflows for automated deployments

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

RESEARCH

IEEE Publication (2024) — Deep Learning for Heart Disease Detection

- Built and evaluated Python-based deep learning models; analyzed performance and real-world applicability

SOFT SKILLS

Problem Solving • Debugging • Communication • Collaboration with Product & Design Teams • Ownership • Adaptability
