SUMMARY

Front End Developer with 2.5+ years of experience building responsive, performance-optimized web applications with React.js and Next.js. Strong proficiency in JavaScript (ES6+) with working knowledge of TypeScript; experienced in component-driven development, state management, SSR/SSG rendering strategies, code-splitting, and consuming REST and GraphQL APIs with caching and retry strategies. Full-stack (MERN) foundation enables close collaboration with backend teams on end-to-end features.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript (working knowledge), HTML5, CSS3, SASS/SCSS
React.js: Functional Components, Hooks, Context API, Error Boundaries, Portals, Suspense
Frameworks & Routing: Next.js (SSR, SSG, ISR), React Router, Dynamic Imports, Code-Splitting
State Management: Redux Toolkit, Zustand, Context API
Styling: SASS/SCSS, Tailwind CSS, Component-Driven Development, Responsive Design
APIs: REST & GraphQL consumption, Caching & Retry Strategies, JWT Authentication
Architecture: Micro-Frontends (Module Federation — working knowledge), Performance Optimization, RBAC
Backend & Tools: Node.js, Express.js, MongoDB, PostgreSQL, Git, Docker, CI/CD, Vercel, Netlify

EXPERIENCE

Full Stack Developer (MERN + Shopify) — Grest
Mar 2026 – Present

- Build responsive, component-driven storefront features (cart, checkout gating, product carousels) for a live e-commerce platform serving daily customers
- Consume REST APIs with caching and retry strategies for cart and pricing flows, keeping the UI consistent under failure conditions
- Optimized frontend performance across mobile and desktop breakpoints — reduced layout shifts and improved load behavior
- Implemented JWT-based authentication and role-based access control (RBAC)
- Monitor, debug, and resolve production UI issues, ensuring an uninterrupted customer experience

Full Stack Developer (Angular) — AGBE India
Apr 2025 – Mar 2026

- Developed e-commerce admin dashboards for products, orders, and users with reusable, component-driven UI patterns
- Implemented filters, pagination, and complex data workflows over REST APIs
- Wrote functional tests for critical UI flows and debugged production defects, improving reliability

Full Stack Developer (Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built responsive web applications using Next.js with SSR/SSG rendering strategies for SEO-critical pages
- Improved page-load performance through code-splitting, dynamic imports, and caching
- Delivered scalable, component-driven frontend architecture for dynamic content platforms

PROJECTS

Arcus Dashboard (Full Stack Application)

- Built a role-based React dashboard with protected routes (React Router) and centralized state management
- Implemented secure access control (RBAC) with JWT authentication and error boundaries for graceful failure handling
- Backend services in Node.js with MongoDB and PostgreSQL

Arcus Dashboard (System Design)

- Designed a modular, independently deployable frontend architecture aligned with micro-frontend principles
- Implemented caching strategies to reduce API response times; built CI/CD workflows for automated deployments

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

RESEARCH

IEEE Publication (2024) — Deep Learning for Heart Disease Detection

- Built and evaluated Python-based deep learning models; analyzed performance and real-world applicability

SOFT SKILLS

Problem Solving • Debugging • Communication • Collaboration with Product & Design Teams • Ownership • Adaptability
