Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4 | Available: Immediate joiner — Remote

SUMMARY

Front-End Developer with 4+ years building responsive, high-performance web applications with React and Next.js in TypeScript. Strong JavaScript (ES6+) fundamentals — closures, async/await, the event loop — with deep hooks and component-architecture experience. Proven track record delivering data-heavy B2B/SaaS dashboards, including interactive D3.js visualizations, Material-UI and Tailwind CSS interfaces, and Redux/Context-driven state. Comfortable owning features end-to-end: translating Figma designs into pixel-accurate UI, integrating secure REST APIs with Keycloak-based auth, writing unit/integration tests with Jest and React Testing Library, and shipping through CI/CD pipelines with ESLint and Prettier enforced. Immediate joiner, available to work remotely full-time.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+) — closures, async/await, event loop, promises; HTML5, CSS3, SASS/SCSS
Frameworks: React (Hooks, Context API, Error Boundaries, Suspense, memoization), Next.js (SSR/SSG/ISR)
State Management: Redux Toolkit, Context API, Zustand
Data Visualization: D3.js, Recharts — interactive charts, dashboards, real-time reporting surfaces
UI & Styling: Material-UI (MUI), Tailwind CSS, CSS Variables, responsive layout (Flexbox, Grid), component-driven development, Figma-to-code
Auth & APIs: Keycloak (identity & access management), JWT, RBAC; REST integration, async data flows, caching & retry strategies
Testing: Jest, React Testing Library — unit & integration tests for critical UI flows
Tooling & Quality: ESLint, Prettier, Git, CI/CD (GitHub Actions), Vite, Webpack, Vercel, Netlify
Performance: Lazy loading, code-splitting, dynamic imports, memoization, Core Web Vitals, cross-browser/device debugging

EXPERIENCE

Front-End Developer (React / Next.js) — Grest **Mar 2024 – Present**

- Lead front-end development of a live e-commerce SaaS platform in React/Next.js and TypeScript, owning features end-to-end from build through release and post-launch monitoring
- Built interactive D3.js dashboards for orders, revenue, and operational metrics, rendering large datasets with smooth, responsive charts and drill-downs
- Developed reusable, component-driven UI with Material-UI and Tailwind CSS, translating Figma designs into pixel-accurate, responsive interfaces
- Integrated secure REST APIs with Keycloak-based authentication and RBAC, managing async data flows with caching, retries, and reliable error/loading states
- Wrote unit and integration tests with Jest and React Testing Library; enforced code quality via ESLint, Prettier, and CI/CD pipelines
- Improved application performance through profiling, code-splitting, and lazy loading — PageSpeed desktop 34→75 and mobile 31→55

Front-End Developer (React / Angular) — AGBE India **Apr 2022 – Mar 2024**

- Built B2B admin dashboards for products, orders, and users with reusable, component-driven UI patterns and Redux-managed state
- Implemented complex data tables with server-side filters, pagination, and sorting over REST APIs, handling async data and edge-case states reliably
- Collaborated with designers, product managers, and backend engineers to ensure the technical feasibility of UI/UX designs
- Wrote functional tests for critical UI flows and debugged production defects, improving reliability and reducing regressions

Front-End Developer (Next.js / React) — Cosmoon Media **Jun 2021 – Mar 2022**

- Built responsive web applications in React/Next.js with SSR/SSG rendering strategies for SEO-critical pages
- Developed and maintained reusable component libraries, improving delivery speed across projects
- Improved page-load performance through code-splitting, dynamic imports, memoization, and caching

PROJECTS

LFO Dashboard — Fleet Management SaaS (React / Next.js / D3.js)

- Built a data-dense fleet-management dashboard in Next.js with D3.js/Recharts visualizations, map views, and GSAP-driven interactions
- Structured reusable, responsive components with TypeScript and managed async data across reporting and listing surfaces

Arcus Dashboard — Role-Based Admin Panel (React / MUI / Keycloak)

- Built a role-based React dashboard with protected routes, centralized Redux state, and RBAC via Keycloak/JWT auth
- Designed a modular architecture with error boundaries and caching; Jest test coverage and CI/CD for automated deploys

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2021 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2019 | CGPA: 9.33

SOFT SKILLS

Ownership • Problem Solving • Root-Cause Debugging • Communication • Collaboration with Product & Design • Adaptability to Shifting Priorities
