HARSH KUMAR MEHTA

Email: harshmehta0519@gmail.com | Phone: +91 9988331757
Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4 | Open to relocate — Bangalore (onsite)

SUMMARY

Frontend Engineer with ~3 years of hands-on production experience building responsive, performance-optimized web applications with React.js and modern JavaScript (ES6+). Strong fundamentals in closures, async/await, and the event loop; fluent with React hooks (useState, useEffect, useContext, custom hooks) and component architecture. Proven track record integrating REST APIs and managing async data flows across B2B SaaS dashboards — scheduling, payments, and reporting surfaces — with caching, retries, and reliable error/loading states. Comfortable owning features end-to-end, from build through post-launch monitoring, and debugging UI issues to root cause across browsers and devices. Available to work onsite full-time in Bangalore.

TECHNICAL SKILLS

Languages: JavaScript (ES6+) — closures, async/await, event loop, promises; TypeScript; HTML5, CSS3, SASS/SCSS

React: Functional Components, Hooks (useState, useEffect, useContext, custom hooks), Context API, Error Boundaries, Suspense, memoization (React.memo, useMemo, useCallback)

State Management: Redux Toolkit, Zustand, Context API

Data & APIs: REST integration, async data flows, caching & retry strategies, JWT auth, RBAC; complex data tables, filters, pagination, sorting

Performance: Lazy loading, code-splitting, dynamic imports, memoization, Core Web Vitals, cross-browser/device debugging

Styling: SASS/SCSS, Tailwind CSS, CSS Variables, responsive layout (Flexbox, Grid), component-driven development

Tooling: Vite, Webpack, ESLint, Git, CI/CD, Vercel, Netlify; Next.js (SSR/SSG/ISR)

Backend (working): Node.js, Express.js, MongoDB, PostgreSQL

EXPERIENCE

Frontend Engineer (React / Next.js) — Grest **Mar 2026 – Present**

- Own production frontend features end-to-end on a live e-commerce SaaS platform — from build through release and post-launch monitoring — serving customers daily
- Built component-driven UI for verification and status-tracking workflows, consuming secure REST APIs with JWT auth, retries, and idempotency, keeping the UI consistent under failure and loading conditions
- Improved application performance through profiling, code-splitting, and lazy loading — PageSpeed desktop 34→75 and mobile 31→55
- Debug and resolve production UI issues to root cause across browsers and devices, not surface-level patches
- Collaborate directly with product and design to translate requirements into clean, responsive UI with minimal back-and-forth

Frontend Engineer (Angular) — AGBE India **Apr 2025 – Mar 2026**

- Built B2B admin dashboards for products, orders, and users with reusable, component-driven UI patterns
- Implemented complex data tables with server-side filters, pagination, and sorting over REST APIs, managing async data and edge-case states reliably
- Wrote functional tests for critical UI flows and debugged production defects, improving reliability and reducing regressions

Frontend Developer (Next.js / React) — Cosmoon Media **Jan 2024 – Mar 2025**

- Built responsive web applications in React/Next.js with SSR/SSG rendering strategies for SEO-critical pages
- Improved page-load performance through code-splitting, dynamic imports, memoization, and caching
- Delivered scalable, component-driven frontend architecture for dynamic content platforms across breakpoints

PROJECTS

LFO Dashboard — Fleet Management SaaS (React / Next.js)

- Built a data-dense fleet-management dashboard in Next.js with charts (Recharts) and map views, plus GSAP-driven interactions and scroll behavior
- Structured reusable, responsive components and managed async data across reporting and listing surfaces

Arcus Dashboard — Role-Based Admin Panel (React)

- Built a role-based React dashboard with protected routes (React Router), centralized state, and RBAC via JWT auth
- Designed a modular architecture with error boundaries and caching to reduce API response times; CI/CD for automated deploys

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

SOFT SKILLS

Ownership • Problem Solving • Root-Cause Debugging • Communication • Collaboration with Product & Design • Adaptability to Shifting Priorities
