HARSH KUMAR MEHTA

Email: harshmehta0519@gmail.com | Phone: +91 9988331757
Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4 | Bangalore — Open to Hybrid

SUMMARY

Frontend Engineer with 4+ years building and modernizing React applications, reusable component libraries, and design systems. Strong JavaScript (ES6+) and HTML/CSS fundamentals, with hands-on experience shipping accessible, well-documented UI components in Storybook, driving design tokens for consistent theming, and building design-to-code workflows from Figma. Experienced writing codemods and migration tooling to upgrade large frontend codebases safely, backed by React Testing Library and Jest coverage. Comfortable across the stack with Python and MySQL for supporting tooling and services. Based in Bangalore and open to a hybrid arrangement.

TECHNICAL SKILLS

Core: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS/SCSS

Design Systems: Component libraries, Storybook, design tokens, theming, Figma design-to-code, reusable primitives & patterns

Tooling & Migration: Codemods (jscodeshift), migration tooling, monorepos, ESLint, Prettier, Vite, Webpack, Git, CI/CD

Accessibility: WCAG 2.1, ARIA, keyboard navigation, screen-reader testing, accessible component APIs

Testing: React Testing Library, Jest — unit, integration, and visual/regression coverage

State & Data: Redux Toolkit, Context API; REST integration, async data flows, caching & retries

Backend (working): Python, MySQL, Node.js, Express.js — supporting services & tooling

Performance: Lazy loading, code-splitting, memoization, Core Web Vitals, cross-browser/device debugging

EXPERIENCE

Frontend Engineer (React / Design Systems) — Grest **Mar 2024 – Present**

- Modernized frontend tooling and built a reusable React component library documented in Storybook, standardizing UI across a live SaaS platform
- Introduced design tokens for color, spacing, and typography, enabling consistent theming and a cleaner design-to-code handoff from Figma
- Wrote codemods (jscodeshift) and migration tooling to upgrade legacy components safely across the codebase with minimal manual churn
- Built accessible components to WCAG 2.1 — ARIA roles, keyboard navigation, and screen-reader support — validated with React Testing Library and Jest
- Improved application performance through profiling, code-splitting, and lazy loading — PageSpeed desktop 34→75 and mobile 31→55

Frontend Engineer (React) — AGBE India **Apr 2022 – Mar 2024**

- Built B2B admin dashboards with reusable, component-driven UI patterns and centralized Redux state
- Developed and maintained shared component libraries, improving delivery speed and consistency across teams
- Implemented complex data tables with server-side filters, pagination, and sorting over REST APIs; built Python/MySQL-backed tooling to support reporting
- Wrote functional tests for critical UI flows and debugged production defects, reducing regressions

Frontend Developer (React / Next.js) — Cosmoon Media **Jun 2021 – Mar 2022**

- Built responsive web applications in React/Next.js with SSR/SSG rendering strategies for SEO-critical pages
- Created reusable UI components and improved page-load performance through code-splitting and memoization

PROJECTS

Component Library & Design System (React / Storybook / Design Tokens)

- Built a themeable React component library with design tokens, documented and tested in Storybook with accessibility checks
- Authored codemods to migrate consuming apps to new component APIs without breaking builds

LFO Dashboard — Fleet Management SaaS (React / Next.js)

- Built a data-dense fleet-management dashboard with reusable, responsive components and chart/map views
- Structured a scalable component architecture and managed async data across reporting surfaces

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2021 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2019 | CGPA: 9.33

SOFT SKILLS

Ownership • Problem Solving • Root-Cause Debugging • Communication • Collaboration with Product & Design • Adaptability to Shifting Priorities
