Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4

SUMMARY

Full Stack AI Engineer with 2+ years building AI-powered, production web applications end to end. Strong in React.js and Next.js on the frontend with Node.js/Express services on the backend, and hands-on integrating Generative AI and LLMs — OpenAI, Azure OpenAI, Anthropic (Claude), and Google Gemini — into real product features. Experienced with prompt engineering, streaming responses, RAG, function/tool calling, and shipping LLM integrations behind clean, scalable APIs. Comfortable owning features across the full stack and working autonomously in a remote team. Backed by an applied-ML research background (IEEE publication).

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router, SSR/ISR), TypeScript, Tailwind CSS, Responsive UI
Generative AI & LLMs: OpenAI, Azure OpenAI, Anthropic (Claude), Google Gemini APIs; prompt engineering, streaming, function/tool calling, RAG, embeddings & vector search
Backend: Node.js, Express.js, REST APIs, serverless/edge functions, JWT Auth, webhooks, third-party API integrations
Languages: JavaScript (ES6+), TypeScript, Python, SQL
Databases: MongoDB (NoSQL), PostgreSQL/MySQL (Relational), vector stores
Cloud & Tools: Vercel, GCP, Docker, Git, CI/CD (GitHub Actions), Postman
AI Dev Tooling: Claude Code, Cursor, Copilot — agentic, LLM-assisted development workflows

EXPERIENCE

Full Stack Developer — Grest
Mar 2026 – Present

- Build AI-powered features into a live consumer platform — integrated LLM APIs (OpenAI / Anthropic) for content generation, product enrichment, and automation behind Node.js services
- Developed React/Next.js frontends and backend REST APIs end to end, with streaming LLM responses and clean prompt/response handling
- Built Python automation and data pipelines for scraping, cleanup, and bulk catalog updates, cutting manual effort by ~90%
- Integrated third-party APIs (Shopify Admin REST/GraphQL, pricing, webhooks) with retry and idempotency
- Improved site performance through profiling — PageSpeed desktop 34→75 and mobile 31→55
- Use AI dev tooling (Claude Code, Cursor) daily to ship features and refactors faster

Full Stack Developer — AGBE India
Apr 2025 – Mar 2026

- Built admin dashboards and data workflows for products, orders, and users with reusable component architecture
- Integrated third-party APIs, implemented filters/pagination, and wrote functional tests for critical flows
- Debugged and remediated production defects, improving reliability

Full Stack Developer (Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built responsive, performance-optimized web applications using Next.js and modern JavaScript
- Integrated backend services and improved page-load performance through caching and code-splitting

PROJECTS

AI Assistant / LLM Integration (Next.js + Node.js)

- Built a chat-style assistant with streaming LLM responses, function/tool calling, and RAG over a document store using embeddings and vector search
- Abstracted a provider-agnostic layer to swap between OpenAI, Anthropic, and Gemini models; handled rate limits, retries, and token/cost tracking

Arcus Dashboard (Full Stack Application)

- Role-based dashboard with RBAC and JWT auth; Node.js backend over MongoDB and PostgreSQL with automated API tests and CI/CD

RESEARCH

IEEE Publication (2024) — Deep Learning for Heart Disease Detection

- Built and evaluated Python deep learning models; owned data preprocessing, feature engineering, and model evaluation

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

SOFT SKILLS

End-to-End Ownership • Autonomous Remote Collaboration • Problem Solving • Product Thinking • Communication • Adaptability
