HARSH KUMAR MEHTA

Email: harshmehta0519@gmail.com | Phone: +91 9988331757
Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4

SUMMARY

Lead Full Stack Engineer with strong expertise across web and mobile application development using **Node.js, TypeScript, Express.js, React.js**, and **React Native**. Experienced in designing scalable, maintainable, and high-performing applications, building RESTful APIs and microservices, and shipping cross-platform mobile apps end to end. Applies **SOLID principles**, clean-coding practices, and **OWASP** security standards, backed by unit/integration testing with **Jest** and data access via **TypeORM** over PostgreSQL/MySQL. Proven ability to lead technical initiatives, perform code reviews, and mentor engineers while collaborating in a remote-first, English-speaking global team.

TECHNICAL SKILLS

Backend: Node.js, Express.js, TypeScript, RESTful API & microservices design, TypeORM, JWT auth, OWASP security, webhooks, third-party integrations
Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive UI
Mobile: React Native (cross-platform iOS & Android), app store deployment; exposure to native modules and mobile CI
Databases: PostgreSQL, MySQL, MongoDB; schema design, indexing, query optimization, TypeORM/SQL fundamentals
Testing & Quality: Jest (unit/integration), code reviews, SOLID principles, clean code, debugging, performance profiling
Cloud & DevOps: AWS / GCP, Docker, CI/CD (GitHub Actions), production deployment & monitoring
Leadership: Technical initiative ownership, mentoring, architecture & code-quality standards, Agile collaboration

EXPERIENCE

Lead Full Stack Engineer (Node.js / React / React Native) — Grest
Mar 2026 – Present

- Lead development of **Grest**, a device trade-in platform, owning architecture across a **React Native mobile app**, React web frontend, and **Node.js/TypeScript** REST APIs, with **Government of India integration** for device/IMEI verification — deployed on **AWS**
- Built the cross-platform **Grest mobile app** in React Native — device valuation, IMEI/serial capture, trade-in quotes, order tracking, and push notifications — shipped to both iOS and Android
- Designed scalable, maintainable services following **SOLID principles** and **OWASP** standards; secured APIs with JWT auth, input validation, retries, and idempotency for government and third-party integrations
- Set up data access with **TypeORM** over PostgreSQL and added **Jest** unit/integration tests for critical flows
- Perform code reviews and mentor developers; drive clean-coding and testing standards across the team
- Improved performance through profiling and optimization — PageSpeed desktop 34→75, mobile 31→55; built Python automation cutting manual effort by ~90%
- Maintain and extend the **Shopify** storefront — Admin REST/GraphQL integrations, pricing, and webhooks driving the trade-in flow

Full Stack Developer — AGBE India
Apr 2025 – Mar 2026

- Developed Node.js/TypeScript REST APIs and React dashboards for products, orders, and users with a reusable component architecture
- Implemented filters, pagination, and Jest tests for critical flows; wrote clean, maintainable, efficient code
- Participated in code reviews and debugged and remediated production defects, improving reliability and performance

Full Stack Developer (Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built responsive, performance-optimized web applications using React/Next.js and modern JavaScript/TypeScript
- Integrated backend services and improved page-load performance through caching and code-splitting

PROJECTS

Grest TradeIn Mobile App (React Native + Node.js/TypeScript)

- Cross-platform iOS/Android app for instant device trade-in valuation with Government of India IMEI verification and live order tracking
- TypeScript REST APIs over PostgreSQL (TypeORM), JWT-secured per OWASP guidelines, with Jest test coverage and CI/CD

Arcus Dashboard (React + Node.js/TypeScript)

- Role-based dashboard with RBAC and JWT authentication; Node.js/Express backend over PostgreSQL and MongoDB
- Secured REST APIs, automated API tests with Jest, and set up CI/CD for reliable, scalable deployments

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

ADDITIONAL

IEEE Publication (2024) — Deep Learning for Heart Disease Detection (Python, model evaluation)

SOFT SKILLS

Technical Leadership • Mentoring • Code Reviews • Problem Solving • Open Collaboration • Communication (fluent English) • Ownership
