Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4

SUMMARY

Full-Stack Developer with 3+ years of professional experience building scalable web applications end to end on the **MERN stack — MongoDB**, **Express**, **React.js**, and **Node.js**. Strong in JavaScript (ES6+) and **TypeScript**, with a track record of shipping responsive React interfaces, designing and securing **RESTful APIs**, and modeling MongoDB data that holds up in production. Comfortable owning a feature end to end — shaping the UI, designing the Express/Node services behind it, and integrating the two — while collaborating with designers, product, and backend engineers. Experienced with Git workflows, code reviews, cloud platforms, and CI/CD pipelines, and focused on clean, well-tested code and optimizing applications for performance and scalability.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router, SSR/ISR), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive UI
Backend: Node.js, Express.js, RESTful API design, JWT authentication & API security, webhooks, third-party API integrations
Databases: MongoDB (NoSQL) — schema/data modeling, indexing, aggregation, query optimization; PostgreSQL, MySQL
Cloud & DevOps: AWS / GCP, Vercel, Docker, CI/CD (GitHub Actions), production deployment & monitoring
Version Control: Git & GitHub — branching, pull requests, code reviews, modern dev workflows
Languages: JavaScript (ES6+), TypeScript, Python, SQL
Practices: Clean/maintainable code, testing, debugging, performance profiling, Agile & cross-functional collaboration

EXPERIENCE

Full Stack Developer (MERN) — Grest
Mar 2026 – Present

- Designed and built **Grest TradeIn**, a device trade-in platform with **Government of India integration** for device/IMEI verification — React frontend, Node.js/Express REST APIs over MongoDB, deployed on **AWS**
- Modeled MongoDB collections for devices, verification jobs, and order state; added indexing and aggregation to keep queries fast under production load
- Integrated secure government and third-party APIs with JWT auth, retries, and idempotency; owned verification workflows and status tracking end to end
- Maintain and extend the **Shopify** storefront — Admin REST/GraphQL integrations, pricing, and webhooks driving the trade-in flow
- Improved application performance through profiling and optimization — PageSpeed desktop 34→75 and mobile 31→55
- Deploy features on AWS via CI/CD and support production issues; collaborate with product and design in a fast-moving, cross-functional team

Full Stack Developer (MERN) — AGBE India
Apr 2025 – Mar 2026

- Built admin dashboards and data workflows for products, orders, and users with a reusable, responsive React component architecture
- Developed Node.js/Express REST APIs over MongoDB, integrated third-party services, and implemented filters, pagination, and functional tests for critical flows
- Participated in code reviews and debugged and remediated production defects, improving reliability and maintainability

Full Stack Developer (React / Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built responsive, performance-optimized web applications using React/Next.js and modern JavaScript (ES6+) / TypeScript
- Integrated Node.js backend services and improved page-load performance through caching and code-splitting

PROJECTS

Arcus Dashboard (Full Stack — MERN)

- Role-based dashboard with RBAC and JWT authentication; Node.js/Express backend over MongoDB with a React frontend
- Secured REST APIs, added automated API tests, and set up CI/CD for reliable deployments

AI Assistant / LLM Integration (React + Node.js)

- Built a chat-style assistant with streaming responses and RESTful backend APIs; integrated third-party provider APIs behind a clean, scalable service layer
- Handled rate limits, retries, and error handling for robust production behavior

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

ADDITIONAL

IEEE Publication (2024) — Deep Learning for Heart Disease Detection (Python, model evaluation)

SOFT SKILLS

End-to-End Ownership • Cross-Functional Collaboration • Problem Solving • Communication • Product Thinking • Adaptability
