SUMMARY

Node.js Developer with strong server-side programming experience building scalable, high-performance web applications. Proficient in **JavaScript (ES6+)** and asynchronous programming, with a proven track record of designing and shipping **RESTful APIs** and **microservices** that power both front-end applications and third-party integrations. Experienced with **MongoDB, MySQL, and PostgreSQL**, writing clean and maintainable code, and optimizing applications for maximum speed and scalability. Comfortable implementing security and data-protection measures (JWT auth, input validation, secure API design), collaborating closely with front-end developers, and troubleshooting and debugging in production. A fast learner who stays current with emerging technologies and industry trends.

TECHNICAL SKILLS

Backend: Node.js, Express.js, RESTful API design, Microservices architecture, asynchronous programming, JWT authentication & API security, webhooks, third-party API integrations
Databases: MongoDB (NoSQL), MySQL, PostgreSQL; schema design, indexing, query optimization
Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive UI
Cloud & DevOps: AWS / GCP, Docker, CI/CD (GitHub Actions), production deployment & monitoring
Version Control: Git & GitHub — branching, pull requests, code reviews
Languages: JavaScript (ES6+), TypeScript, Python, SQL
Practices: Clean/maintainable code, security & data protection, testing, debugging, performance profiling, Agile collaboration

EXPERIENCE

Node.js / Full Stack Developer — Grest
Mar 2026 – Present

- Design, develop, and maintain **server-side applications and RESTful APIs** in **Node.js/Express** over MongoDB for **Grest TradeIn**, a device trade-in platform with **Government of India integration** for device/IMEI verification, deployed on **AWS**
- Built secure government and third-party API integrations with **JWT authentication**, retries, and idempotency; implemented security and data-protection measures across verification and status-tracking workflows
- Collaborated with front-end developers to integrate React UI with server-side logic; maintained and extended the **Shopify** storefront via Admin REST/GraphQL integrations, pricing, and webhooks
- Optimized applications for maximum speed and scalability through profiling and query tuning — PageSpeed desktop 34→75 and mobile 31→55
- Built Python automation and data pipelines for scraping, cleanup, and bulk catalog updates, cutting manual effort by ~90%
- Troubleshoot and debug production issues; deploy features on AWS in a fully remote, Agile workflow

Full Stack Developer — AGBE India
Apr 2025 – Mar 2026

- Developed Node.js REST APIs and integrated third-party services; built admin dashboards and data workflows for products, orders, and users with a reusable React component architecture
- Implemented filters, pagination, and functional tests for critical flows; wrote clean, maintainable, and efficient code
- Participated in code reviews and debugged and remediated production defects, improving reliability and performance

Full Stack Developer (Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built responsive, performance-optimized web applications using React/Next.js and modern JavaScript (ES6+)
- Integrated backend services and improved page-load performance through caching and code-splitting

PROJECTS

Arcus Dashboard (Node.js + React)

- Role-based dashboard with RBAC and JWT authentication; Node.js/Express backend over MongoDB and PostgreSQL
- Secured REST APIs, added automated API tests, and set up CI/CD for reliable, scalable deployments

AI Assistant / LLM Integration (Node.js + Next.js)

- Built a chat-style assistant with streaming responses and RESTful backend APIs; integrated third-party provider APIs behind a clean, scalable microservice-style layer
- Handled rate limits, retries, and error handling for robust production behavior

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

ADDITIONAL

IEEE Publication (2024) — Deep Learning for Heart Disease Detection (Python, model evaluation)

SOFT SKILLS

Problem Solving • Attention to Detail • Communication • Collaboration • End-to-End Ownership • Adaptability
