HARSH KUMAR MEHTA

Email: harshmehta0519@gmail.com | Phone: +91 9988331757
Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4

SUMMARY

Software Engineer with 2+ years building and shipping full-stack products, with strong front-end and user interface development in React.js and Next.js and backend services in Node.js. Solid foundation in data structures, algorithms, and system design; comfortable across the full stack — design, development, testing, deployment, and production debugging. Experienced in code reviews and engineering best practices (style, testability, efficiency). Advanced degree (MCA) with published IEEE research. Versatile, ownership-driven, and eager to solve real problems at scale.

TECHNICAL SKILLS

Front-end & UI: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive & Accessible UI (semantic HTML, ARIA)
Languages: JavaScript/TypeScript, Python, SQL, Java (DSA)
Backend: Node.js, Express.js, REST APIs, JWT Auth, Microservices, third-party API integrations
CS Fundamentals: Data Structures & Algorithms, System Design, OOP, Distributed & Multi-Tiered Systems, Caching
Databases: PostgreSQL/MySQL (Relational), MongoDB (NoSQL), Query Optimization
Practices & Tools: Code Reviews, Automated Testing, Debugging, Git, CI/CD (GitHub Actions), Docker, Postman, Agile (Scrum)

EXPERIENCE

Full Stack Developer — Grest
Mar 2026 – Present

- Design, develop, test, and deploy full-stack features for a live consumer web platform — React/Next.js front-end backed by Node.js/Express services
- Build accessible, responsive user interfaces and reusable components; improved performance via profiling — PageSpeed desktop 34→75 and mobile 31→55
- Participate in design discussions and code reviews, enforcing best practices for style, testability, and efficiency
- Triage, debug, and resolve production issues by analyzing root causes and impact on service quality
- Designed relational and NoSQL schemas and optimized queries; integrated third-party APIs with retry and idempotency
- Built Python automation for data scraping and bulk updates, cutting manual effort by ~90%

Full Stack Developer — AGBE India
Apr 2025 – Mar 2026

- Developed admin dashboards and data-heavy UIs for products, orders, and users with reusable component architecture
- Implemented filters, pagination, and interactive workflows; wrote functional tests for critical flows
- Reviewed peers' code and debugged production defects, improving reliability

Full Stack Developer (Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built responsive, performance-optimized front-end applications using Next.js and modern JavaScript
- Improved page-load performance through caching and code-splitting; integrated backend services for dynamic content

PROJECTS

Arcus Dashboard (Full Stack Application)

- Built a role-based dashboard with an accessible React front-end and Node.js backend over MongoDB and PostgreSQL
- Designed distributed, multi-tiered services with caching to reduce API latency; added automated tests and CI/CD

Portfolio & UI Work — harshbuilds.vercel.app

- Designed and shipped responsive, accessible interfaces with attention to semantics, keyboard navigation, and performance

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

RESEARCH

IEEE Publication (2024) — Deep Learning for Heart Disease Detection

- Built and evaluated Python deep learning models; owned data preprocessing, feature engineering, and model evaluation

SOFT SKILLS

Full-Stack Versatility • Ownership • Design Reviews & Collaboration • Problem Solving • Communication • Adaptability
