HARSH KUMAR MEHTA

Email: harshmehta0519@gmail.com | Phone: +91 9988331757
Portfolio: harshbuilds.vercel.app | LinkedIn: linkedin.com/in/harsh-mehta-0a99632a4

SUMMARY

Software Engineer with 2+ years designing, developing, testing, and maintaining scalable, secure, and user-centric web applications in production. Strong in full-stack development with Node.js/Express and React/Next.js, REST API design, and data modelling across SQL and NoSQL. Experienced building tools and platforms that support content delivery and end-user experiences. Works within Agile teams — participates in sprint planning, stand-ups, and retrospectives — performs code reviews, debugging, and defect resolution, and maintains clear technical documentation. Eager to contribute to high-impact digital learning solutions and continuous improvement initiatives.

TECHNICAL SKILLS

Web & Frontend: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive & Accessible UI
Backend: Node.js, Express.js, REST API design, JWT Auth, RBAC, Microservices, Third-Party API Integrations
CS Fundamentals: Data Structures & Algorithms, Software Architecture, Design Patterns, System Design, OOP, Caching
Databases: PostgreSQL/MySQL (Relational), MongoDB (NoSQL) — Schema Design, Query Optimization, Indexing
Quality & Process: Code Reviews, Unit / Integration / Regression Testing, Debugging, Defect Resolution, Technical Documentation
Cloud & Tools: GCP, Docker, Git, CI/CD (GitHub Actions), Postman, Agile (Scrum)

EXPERIENCE

Full Stack Software Engineer — Grest
Mar 2026 – Present

- Design, develop, test, and maintain scalable web applications and REST APIs on a Node.js/Express and React stack powering a live platform serving daily users
- Build high-performance, secure, and user-centric features; designed SQL and MongoDB schemas and optimized queries and indexes for throughput
- Perform code reviews, debugging, and defect resolution to ensure application reliability and functional accuracy
- Participate in Agile ceremonies — sprint planning, daily stand-ups, and retrospectives — and maintain design and code documentation
- Automated integration and regression tests and CI/CD pipelines for repeatable, reliable releases
- Integrated third-party APIs with retry and idempotency; built Python automation cutting manual effort by ~90%

Full Stack Developer — AGBE India
Apr 2025 – Mar 2026

- Built web applications and admin workflows for products, orders, and users over relational databases
- Implemented data workflows, wrote functional tests, and reviewed peers' code for quality and correctness
- Debugged and remediated production defects, improving application reliability and usability

Frontend / Full Stack Developer (Next.js) — Cosmoon Media
Jan 2024 – Mar 2025

- Built performance-optimized applications and integrations for dynamic content-delivery platforms
- Improved response and page-load performance through caching and code-splitting

PROJECTS

Arcus Dashboard (Full Stack Application)

- Designed a scalable, multi-tiered microservices architecture with caching to reduce API latency
- Built Node.js backend and React frontend over MongoDB and PostgreSQL with RBAC, JWT auth, automated tests, and CI/CD

Price Intelligence Engine (Node.js + Python)

- Built a service that scrapes, normalizes, and stores live pricing into a relational database, exposed via REST APIs and scheduled jobs

EDUCATION

Master of Computer Applications (MCA)
Birla Institute of Technology, Mesra — 2025 | CGPA: 8.1

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University (GGSIPU) — 2023 | CGPA: 9.33

RESEARCH

IEEE Publication (2024) — Deep Learning for Heart Disease Detection

- Built and evaluated Python deep learning models; owned data preprocessing, feature engineering, and model evaluation

SOFT SKILLS

Software Quality Focus • Collaboration Across Cross-Functional Teams • Code Reviews • Problem Solving • Self-Directed Learning • Continuous Improvement
